

**Mihealth Global Systems Inc.,  
Using Diversinet MobiSecure® Solution**

<p><b>What is Mihealth?</b></p>	<p>Mihealth is a service that empowers patients with the information they require to take better control of their own health and wellness. This approach not only reduces dependency on the health care system but also facilitates a proactive approach to health management so overall health and wellness can improve dramatically.</p> <p>Mihealth is powered by Diversinet, a leading provider of secure applications that enable healthcare organizations to rapidly deploy HIPPA-compliant mHealth applications for the mobile world.</p>
<p><b>What was the challenge or need?</b></p>	<p>Like most healthcare providers, Dr. Wendy Graham, previously a lead physician with the Blue Sky Family Health Team, needed a way to do more with less – to serve more patients better, at lower costs. Dr. Graham sought a solution to:</p> <ul style="list-style-type: none"> <li>• Help patients more actively manage their health and wellness.</li> <li>• Enable patients to enter, retrieve and update consolidated medical records for themselves and relatives conveniently, using their Web-connected computers and mobile devices.</li> <li>• Reduce physician workloads and decrease unnecessary phone communications and office visits.</li> <li>• Improve patient health – a result of better compliance from better-informed patients taking medications as prescribed and following treatment plans.</li> </ul>
<p><b>How do patients use Mihealth?</b></p>	<p>Mihealth lets patients create and update personal health records (PHRs), verified by their physicians. These records contain:</p> <ul style="list-style-type: none"> <li>• A summary of the patient’s healthcare information, including family history, main diagnoses, allergies, medications and therapies.</li> <li>• Data on upcoming and previous appointments, treating physicians, and lab reports.</li> <li>• A space for additional information, such as demographic data and third-party insurance providers.</li> </ul> <p>Common uses include:</p> <ul style="list-style-type: none"> <li>• Receiving appointment reminders and routine test results.</li> <li>• Secure messaging with care givers for improved patient/provider communication</li> <li>• Sharing an elderly parent’s prescriptions with a care giver.</li> <li>• Obtaining personalized tips on managing chronic conditions.</li> <li>• Retrieving a child’s immunization records for summer camp.</li> <li>• Accessing a spouse’s medical history at the emergency room.</li> <li>• Confirming insurance coverage for an emergency while traveling.</li> </ul>

<p><b>What benefits does Mihealth offer?</b></p>	<p>Patient Benefits:</p> <ul style="list-style-type: none"> <li>• Anytime, anywhere access to your care provider and health information</li> <li>• Platinum-level, password protected security</li> <li>• Secure messaging</li> <li>• Share all or part of your medical information with family members/circle of care</li> <li>• View lab results</li> <li>• Schedule appointments</li> </ul> <p>Physician Benefits:</p> <ul style="list-style-type: none"> <li>• Connect to your patients like never before with 24/7 access to their health information</li> <li>• Platinum-level, password protected security</li> <li>• Secure messaging</li> <li>• More information at your fingertips to help make better decisions</li> <li>• Check in on patients and encourage more proactive care</li> </ul>	
<p><b>Can Mihealth preserve a patient's privacy while supporting wireless?</b></p>	<p>The Mihealth team conducted a third-party Privacy Impact Assessment for the clinical trial before launch and has presented the operational aspects to the Privacy Commissioner's office of Ontario. Thus far, both the Diversinet product and the operational procedures used by Mihealth to administer the trial have received high marks for security and privacy protection.</p>	
<p><b>What technology supports Mihealth?</b></p>	<p>Mihealth uses Diversinet's Health Application built on its MobiSecure<sup>®</sup> Communicator application, which safely connects people with their healthcare information and care givers anytime, anywhere. Distinctive benefits of the MobiSecure<sup>®</sup> solution include:</p> <ul style="list-style-type: none"> <li>• Strong mobile security, encryption, and two-factor bilateral authentication.</li> <li>• Support for all major mobile devices and platforms.</li> <li>• A broad range of solutions, from messaging to complex transactions.</li> <li>• Capability for handling both patient-entered and physician-verified information.</li> </ul>
